

## **Ad Manager™ Website Advertising**

Ad Manager allows you to configure an ad server to use on your website. Having an ad server lets you:

- Place banner advertisements on your website,
- Manage advertising clients,
- Collect statistics on banner "views" and "click throughs."

With easy step-by-step instructions, Ad Manager can be up and running in no time and there is no need to purchase any costly ad manager software. With a simple point and click, you can choose from rotating or static banners, why not start generating revenue from the advertising of banners on your site today!
