

EasySiteWizard 6.0-Enhancements

iSelect Internet EasySiteWizard 6.0 brings world class ease of use and even more features to what is already a state-of-the-art site creation application. Here is a summary of some version 6.0 enhancements:

- EasySiteWizard 6.0 is done almost exclusively in DHTML. This removes the previous End User requirement to download a Java Development Kit
- New logical groupings of template categories, along with pre-filled content speed up the site creation process
- More intuitive and friendly “Windows” style appearance
- Preview page feature allows the user to preview their site creation progress at any time
- Clone an existing site with a simple click of a button. Cloning enables you to create a copy of your site, make changes to the clone, preview it – all without risk of disturbing your published site
- SiteSparks provide useful and user friendly “drag and drop” features such as Visitor Counter, Google search box, Calendar and many more.
- Improved interface with “drag-and-drop” capabilities, multiple fonts and colors, image resizing and thousands of free, high quality images
- Pre-filled text gives you an idea of what the page would look like in a professional lay-out. Use the familiar text editor to replace it with your own, add some images and you have a web page!

The best-in-class EasySiteWizard 6.0 enables any business to easily create a professional website in minutes without html knowledge.
