1. What is EasySiteWizard 6.0?

EasySiteWizard 6.0 is a robust and intuitive application that will allow you to create a completely customized website in a few simple steps. There is more than 300 industry categorized, professionally designed templates available for you to choose from. Plus, you are given the option to upload your own graphics or logos for use in your site or use our image library of 10,000 images. With our embedded Page Editor you can tailor your website to exactly your specifications using true "WYSIWYG" (what you see is what you get) technology that will allow you to create your website in the most simplest of ways. No knowledge of HTML is necessary!

2. Do I need to install any special software?

EasySiteWizard 6.0 can be found your WebsiteOS™ under the site builder tool set. In order to use the PageEditor application, you will need to have a compatible browser, such as IE 6+, Mozilla 1.6 +, FireFox 0.9 +, or Netscape 7.1 +.

3. How many pages can I have on my website?

All EasySiteWizard 6.0 templates allow you to have up to 20 pages on your website.

4. Can I import pictures into my website?

EasySiteWizard 6.0 allows you to import pictures and modify the size of them into any page of your website. This is located in "Build your Site", section in the Insert Menu, under Images. We also provide an image library of 10,000 free images you may use, an unlimited amount of times for any website you wish to create.

5. Do I have the option to create my site in HTML?

Yes, you can create your site in HTML. HTML code will be displayed in the WYSIWYG page editor.

6. Will I be able to choose different page layouts?

Yes, you will be able to choose from different layouts, depending on the template you have selected.

7. Can I link text and pictures to other websites?

Text and pictures can be linked to other websites. EasySiteWizard 6.0 allows you to link either text or pictures to a new website in either in the default frame, entire window or a new window.

8. What are Meta tags? Why should I use them with EasySiteWizard 6.0?

Meta tags are used by search engines to help find your website. When you type a search topic on a search engine website, it uses a software program called a spider to search through the Meta tags of websites in its list and find ones that match your search word. Your Meta tags will not appear on your website, as they are hidden in the HTML code. You can edit Meta tags in "Define your Site", in description and/or keywords.

9. Will the website I create use frames?

All EasySiteWizard 6.0 multi-site website templates are all frame based. This will provide you with the ability to create a flexible and robust website.

10. What image types are offered in the image library?

To offer you the greatest flexibility with image insertion for your website, all our images in the image library are transparent .gif files. Transparent .gif files provide the greatest compatibility in adding our images to your website without you having to edit the images yourself. These images can be found within "Build your Site" section of ESW 6.0. Choose Insert Menu> Image> Free Images.
