

## SiteSparks™ on EasySiteWizard™

# Add Compelling Web functionality to your Online Business

SiteSparks are special customizable plug-ins that can be easily added to your page without any webpage scripting knowledge. SiteSparks are user-friendly functions for your website that not only enhance your site's appeal but also offer business applications to your visitors.

If you want increased web site traffic, stickier users and useful applications that save time and money – you need SiteSparks! Best of all, SiteSparks can be added to your site instantly without programming or scripts. They just work!

Have fun with these SiteSparks and make your site:

- Informative
- Entertaining
- Educational
- Interactive

---

### FEATURES OF SITESPARKS™

**Auto Scroller-** Scroll the web page without any mouse movement! This is great for presentations or for long texts.

**Calendar-** Customize the calendar's font, color, and display mode to your company's design, plus update as often as you like.

**Hit Counter-** Let visitors know how many others have "hit" the same page with this counter. Customize the counter's font, size, and color to your designs.

**Auto Typer-** Allow users to set up text, which will appear inside a textbox one character at a time, simulating the effect of watching someone typing

**Countdown-** Use this module to countdown the days until a special event, sale or a holiday begins.

**Google Search-** Insert "Google Search" on your page as an extra value for you customers. Provide your visitors with the ability to perform searches through the World Wide Web by keywords.

**Mouse Trails-** Make a text or image that will automatically follow the mouse pointer

**Random Quotation / Image-** Let multiple messages randomly appear on your site! Each message is fully editable and can be of different fonts and text sizes.

**Add Flash-** Insert shockwave flash files into your website, including sound!

**Video Stamp-** Upload video files to your website!

**Sticky Message-** Keep your message in place! This lets your message move with your customer, even when the page is scrolled up or down.
